JUSTIFICACION DE LOS MONTOS SOLICITADOS: (Letter size, Verdana size 10 is suggested).

PROPOSAL TRAVEL:
Trips are funded solely for activities directly related with the proposal development, presentation of results and outreach activities to the society. Only **Economy airfares** are accepted. Indicate tentative destinations, purpose and number of days for each trip.

FOREIGN TRAVEL:

	Destination	No. of Days
Year 1	Europe, South or North America	6
Year 2	Europe, South or North America	6
Year 3		

It is planned to attend an International Congress each year, so the work can have a feedback from the International Community of Machine Learning and/or Distributed Computing. The airfair estimated is M$1500 and a daily allowance of M$90. The total cost ascends to M$2040 each year.

DOMESTIC TRAVEL:

	Destination	No. of Days
Year 1	Unknown	5
Year 2	Unknown	5
Year 3		

The main goal of the domestic travel is to disseminate the work in the Chilean community of Machine Learning and Pattern Recognition, and to receive feedback from the researchers. It also expected to start collaboration between researchers of Chilean universities. The purpose will be two attend to Chilean conferences of Pattern Recognition and Computer Science. The airfair estimated is M$250 and a daily allowance of M$60 for 5 days.

OPERATIONAL EXPENSES:

In the following table indicate the estimated annual cost of one or more items necessary for a successful development of the proposal. Insert or delete as many rows as needed.

Subitem	Amount (1000 CLP$)		
	Year 1	Year 2	Year 3
Office supplies	100	100	
Computing-related items	1600	1300	
Reagents and other laboratory non-durable materials			
Books purchases, scientific journals, subscription fees and memberships		300	
Scientific meetings registration fees	210	210	
Payments for services			
Hiring of occasional auxiliary personnel			
Journal publishing costs			
Software and licenses			
Survey(s) Cost			
Focus Group(s) Cost			
Outreach to society activities			
Rent a car, freight payment			
Purchase of office furniture and/or minor conditioning of physical space			
Other: Amazon Cloud Service			
TOTAL (1000 CLP$)	1910	1910	

In the two years of the development of this project we will have to equip us yearly with office supplies and computing-related items, such as photocopies, toner for printers, pens, etc. that are necessary to every laboratory. In the first year it is necessary to buy one notebook to prepare the manuscripts and presentations. Furthermore the mobility granted by the notebooks is helpful for using it in travels, seminars and group meetings (Notebook cost M$1600 CLP). In the second year it is necessary to buy a graphic card in order to take advantage of the multiple graphical processing cores. (Graphic Card cost M$1300 CLP) We also will have to buy in these two years books and journals related to this proposal to study the last advances and the theoretical fundaments, such as Handbook of Machine Learning, Distributed Computing Systems, Special Issues of Distributed and Parallel Computing, etc. In the two years it will be necessary to pay registration fees to international and national conferences.

INITIAL EXPENSES:
Justify the initial expenses, if applicable..
